## *About Project*

What is new? The summer semester has already started. We continue to work hard to develop the rules for designing the course and the curriculum, so that they are the best suited to educational needs and market realities. We visited beautiful Budapest. We check, test and act for the best effect!

We use **Brainstorming** – what are its principles?

- *Set a time limit – 15–60 minutes is normal.*
- *Begin with a target problem/brief*
- *Refrain from judgment/criticism – No critical for any idea.*
- *Encourage weird and wacky ideas .*
- *Aim for quantity – the more ideas, the better.*
- *Build on others' ideas – we develop someone's ideas, treating them as a base*
- *Stay visual – many people are visual learners*
- *Show respect for everyone's ideas.*

All the Partners met at OE :-)

The recent project meeting of ErgoDesign in Budapest marked a significant step towards the development of our innovative curriculum for ergonomic design and the promotion of e-learning in the field. Held on 16-17 May 2023, the meeting brought together project partners to discuss progress, curriculum design principles, platform improvements, and the implementation of training materials. A comprehensive overview of the meeting agenda and key discussions that took place during the event:

### **Day 1 - 16th May 2023**

The participants delved into a comprehensive recap of the activities carried out in PR2, highlighting the achievements and outlining the remaining tasks required to successfully complete PR2.

The discussions then shifted to PR2/A3, which focused on a review of the Course Design Principles and their practical application in creating the ErgoDesign Curriculum.

The discussions continued with PR2/A4, which focused on finalizing the validation of the ErgoDesign Curriculum and its components. The partners provided valuable feedback, enabling necessary revisions and reaching a consensus on the curriculum's structure and content.

Additionally, the partners discussed the Interim Report. PUT and ValueDo clarified its timeline, the required contributions from each partner, and the expected outcomes.

## Day 2 - 17th May 2023

The second day the focus shifted to PR3, with a presentation on the project platform by Technical University of Varna and proposals for its improvement. The partners actively engaged in discussions on enhancements and modifications to ensure an optimal learning experience for the ErgoDesign e-learning platform.

Then, attention turned to PR4, centering around the "ErgoDesign e-learning Training Materials." Collaborative brainstorming and idea sharing took place regarding the practical implementation of the pilot course.

The meeting concluded with a recap of tasks and deadlines, ensuring that all partners were aligned on the next steps and responsibilities.

(...) Its short- More information in our website :)
