### *About Project*

The most important element of the current quarter was a two-day meeting of all partners in Athens. During the meeting, we summarized the activities related to the platform implemented under PR1, set the activities related to State Of Art (PR2) and discussed the Delphi methodology implemented under PR3. The meeting of partners took place at the university of Athens where we were very kindly received. The most important thing, however, is that we have worked out a further way of proceeding in the project.

### Project Context

*What kind of programs can we use in medical design?*

*There are many programs that support the implant manufacturing process in 3D design. Among them are:*

- Blender,
- CREO,
- Fusion360,
- Inverter Professional,
- Maya,
- MeshLab,
- Meshmixer,
- Siemens NX,
- Solid Edge,
- SolidWorks.

*You can read about them on our website [Ergodesigner](http://www.ergodesigner.eu) in the Toolkit tab.*

In September 2022 we were at the Project Meeting in Athens!

All the Partners met at NTUA and had an opportunity to see one another face to face for the first time :-)

The most important elements of the meeting were:

- Presentation of the results from the evaluation from external expert on Dynamic Toolkit and discussion on possible improvements for the final version of the Dynamic Toolkit
- Update on "PR2/A1: State of-the-art and definition of the first principles" about the project.
- Brainstorming on "PR2/A2 Delphi study", in which the partners defined the criteria for the selection of a group of experts.

The crucial issues were: the background (from the partner and other countries) and also including people with special needs and representatives of organizations working with people with special needs.

- Updates on "PR3/A2: Constant update and maintaining of the platform"- the website Ergodesigner.eu and the platform Toolkit are already connected.

Feel invited to use them!

# Newsletter 03/2022

Are you interested in:

- 3d printing in medicine
- a modern, inclusive approach to health
- design for people with disabilities
- ergonomics of work

If you said

follow us on the website, facebook, linkedin or just contact us.

Our design activities results could be appealing to you!

See you soon!
